

# Front Page Model → Product

What do I want to show on the front page products?

Price, Image of product, colors available, sizes available,

How to get Price?

product # → Get Product Info (#) → Product Total Info model

→ Sync Product & Moments Result → Sync Variants [ ] Sync Moments

→ price

if I want to get price

SyncVariants[i] for each or for  $i = \text{syncVariants.length}$   
check price lowest & highest

if price = price, only price  
else price range shown

Brute force approach → check each one.
